ABOUT ME

Aspiring Software Developer with a strong foundation in Data Structures, Algorithms, and Object-Oriented Programming, specializing in building scalable, efficient, and secure applications.

EDUCATION

VISHWAKARMA UNIVERSITY, PUNE

BTech, CSE - CGPA :- 8.03
2022 - 2026

LATE JYOTI JANOLKAR VIDYALAYA, AKOLA

HSC - 83 % 2020 - 2022

SHRI SANT GAJANAN MAHARAJ ENGLISH SCHOOL, SHEGAON

SSC - 91% 2007-2020

INTERNSHIP

VU-BU CENTRE OF DESIGN THINKING AND INNOVATION

Analysis

Feb - June 2025

Market Growth, Policy Impacts, and Technological Advancements in EVs
Greenhouse Technologies [Analysis] - VUBU/S&T/Project/2024-2025/37

- Report:
<https://drive.google.com/file/d/1gn9giAMOSNVf3XleRAGGM2KWuCH/MidKb/view?usp=sharing>

EXPERTISE

- Object-Oriented Programming (OOP)
- Data Structures & Algorithms
- Backend Application Development
- REST API Development & Integration
- Database Design & Query Optimization
- Secure Coding Practices
- Agile & SDLC Methodologies

CODING SKILLS

- JAVA
- Python
- React
- Node.js
- C++

CERTIFICATIONS

- OpenEDG Python Institute: Programming with Python**
PYTHON INSTITUTE
Python (Programming Language), Object-Oriented Programming (OOP)
- React.js Essential Training**
LINKEDIN LEARNING
REACT.js
- Predictive Analytics Essential Training: Data Mining**
IIBA - 2024
- Become a Full-Stack Web Developer**
LINKEDIN LEARNING - 2024
- Data Processing Specialist**
AMCAT - 2023
- Software Development Trainee**
AMCAT - 2022
- More Certificates:** <https://parthgvu.github.io/resume/certificates.html>

PROJECTS

1. VAULTUP - SMART SAVINGS, SAFE FUTURE [PATENT IN PROCESS]

VaultUp is a financial technology application that empowers users to automate, organize, and track their savings with the help of customizable vaults and intelligent saving tools. A cutting-edge fin-tech solution that makes it easier for anyone, particularly young users, to develop financial discipline through goal-based saving, personalized vaults, and streamlined stock market connectivity. Working: <https://shorturl.at/67vec>

2. Business Decision Intelligence Platform (BDIP)

Designed and developed a role-based enterprise analytics platform to support management-level decision making. Implemented secure JWT-based authentication with distinct Admin, Manager, Employee, and Executive roles to ensure controlled access. Built integrated modules for revenue analytics, employee productivity tracking, burnout analysis, and overall business health scoring. Added intelligent recommendation logic to suggest data-driven actions for productivity improvement and burnout mitigation using React.js, FastAPI, and MySQL.

3. Employee Burnout & Productivity Analytics Platform

Developed a real-time and ethical employee activity tracking system to measure productivity and burnout levels. Implemented role-based dashboards for Employees, HR, Managers, and HROs with privacy-aware access control. Designed a human-centric algorithm that fairly adjusts scores without intrusive monitoring. Enabled detailed analytics including daily activity logs, burnout levels, and team-wise performance comparisons using React Native, FastAPI, and SQLite.

4. Smart Farming AI Assistant

Developed an AI-powered agriculture advisory system to provide localized and actionable farming insights for Indian farmers. Integrated real-time weather forecasting, mandi (market) price updates, and AI-based query handling to support informed decision making. Implemented multilingual support to improve accessibility across regions and designed farmer-friendly, practical advisory responses using Flask, GPT4All, Open-Meteo API, OpenStreetMap API, and Google Translate API.
